

WIDE ANGLE
Technology for folding doors

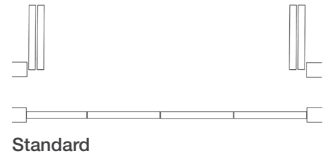

EXPAND YOUR HORIZONS

Centor has developed an innovative solution to create an expanded, wide angle view through traditional even panel folding door configurations: 2L, 2R and 2L2R.

Our Wide Angle technology opens up 125° each side from a standard 90°, giving better views and flow to the outside patio and increased summer breezes.

Wide Angle technology is available on our folding door hardware E2, E3, E4 and F3. Using Centor hardware automatically grants you licence to incorporate our Wide Angle technology (*patent pending) .
